## SUMMARY

Backend-focused Full-Stack Software Developer with strong expertise in Java and Spring Boot, and hands-on experience building scalable, secure, and high-performance applications. Graduated with Distinction in Computer Science with solid knowledge of Data Structures and Algorithms (DSA). Experienced in developing RESTful APIs, authentication systems, and database-driven applications. Proficient in Flutter for cross-platform mobile development and modern frontend integration. Fast learner, adaptable, and passionate about solving real-world problems through clean architecture and efficient system design. Eager to contribute to impactful projects and grow as a professional software engineer.

## EDUCATION

Hawassa University May. 2022 – Jun. 2025  
Bachelor of Science in Computer Science (GPA: 3.47 / 4.0) Hawassa, Ethiopia

- Relevant Coursework: Software Engineering, OOP, Data Structures and Algorithms (C++), Advanced Programming (Java), Computer Security
- Additional Studies: Artificial Intelligence (Python and Lisp), Web Development (PHP JavaScript), Abstract Algebra

## EXPERIENCE

Ashara Software and ICT Solution Addis Ababa, Ethiopia  
Full Stack Software Developer Aug. 2025 – Present

- Developed and maintained backend services using Java and Spring Boot for web and mobile applications, ensuring scalability and performance.
- Developed interactive applications and simple games using JavaScript, Node.js, and Express.
- Collaborated with cross-functional teams to deliver secure, high-performance, and production-ready applications.
- Supported deployment and testing workflows using Git and collaborative development practices.

## PROJECTS

### Mistir File Encryption Software (Desktop)

- Developed a secure AES-256 based file encryption desktop application for protecting sensitive user data.
- Implemented file compression before encryption, reducing encrypted file size and improving storage efficiency.
- Integrated database support using MySQL for application configuration and metadata management.

### Car Rental System with 3D Visualization (Final Year Project Team Lead)

- Led development of a full-stack MERN application with secure authentication and role-based admin access.
- Integrated Stripe and Chapa payment gateways for online transactions.
- Integrated Gemini AI chatbot to enhance user interaction and customer support.

### Genzeb Budget and Expense Planner

- Developed an offline budget and expense tracking mobile application.
- Implemented expense categorization, filtering, and visualization features.
- Integrated SQLite local database for persistent offline storage.

## TECHNICAL SKILLS

- Programming Languages: Java, Dart (Flutter), JavaScript, Python, C++
- Backend Technologies: Spring Boot, Node.js, Express.js, Flask (Basic)
- Frontend Technologies: HTML, CSS, React.js, Flutter
- Databases: MySQL, MongoDB, Firebase Firestore, SQLite
- Tools & Platforms: Git, GitHub Actions, Postman, Insomnia, Android Studio
- Deployment & Hosting: DigitalOcean, cPanel, Vercel
- Operating Systems: Windows, Kali Linux, Ubuntu
